Life Is On

CLIPSAL
by Schneider Electric

The new standard

From a complete range of single and multiple light switches and power outlets, to electronic accessories and network connectivity, Clipsal Iconic™ is the perfect choice for any home. Its sleek, modern design complements any interior with clean looks and clever efficiency.

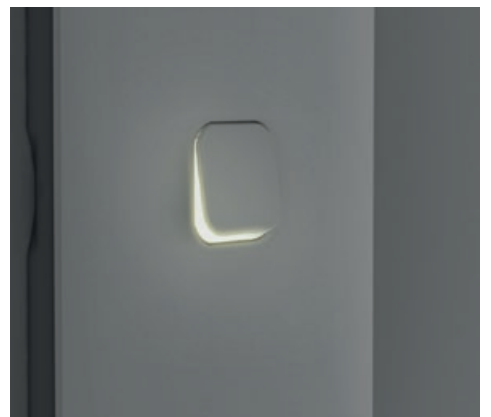

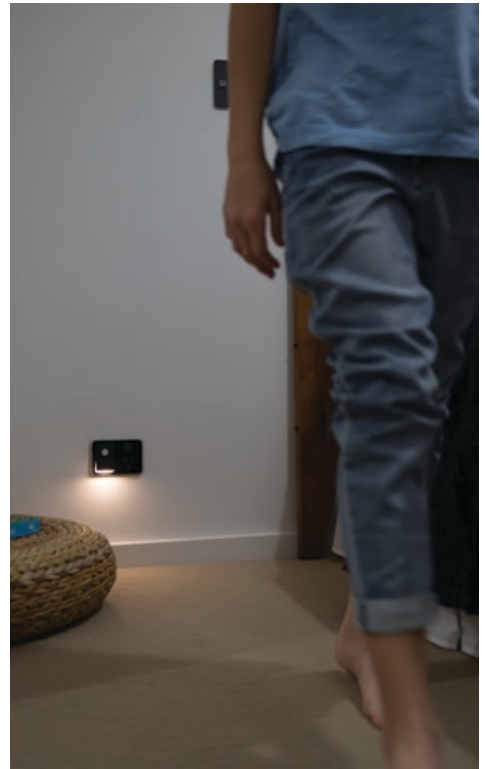

for modern living

Infinitely customisable

Clipsal Iconic™ introduces new opportunities for customisation designed to enhance functionality, aesthetic appeal, and usability. Switches feature changeable skins, and are simple to personalise with pictogram dollies to clearly identify functions. Optional warm white LEDs can be set as indicators or locators making it easy to identify switches in use, or to locate switches in a darkened room.

Innovation in every room

Innovative new products highlight the Clipsal Iconic range, with a new Night Walk Sensor Light skin that simply plugs into a standard Clipsal Iconic double socket grid. When movement is detected at night, an integrated LED lamp illuminates the darkness, guiding the way without disturbing others. There's also a new three-socket USB charger with shelf to hold a tablet or two phones, ideal for bedrooms, kitchens, and family areas.

for every home

Loaded with intelligent features

Clipsal Iconic™ push button 3-wire electronic modules can be set up and controlled using the Wiser Room App on most smart phones or tablets. Simply dim lights, turn on or off, set a time delay, or programme multiple 24 hour, 7-day schedules. The app connects using Bluetooth Low Energy (BLE), which only connects when required. All Iconic electronic push button modules also feature our own built-in Controllink technology allowing you to switch and dim lights from multiple locations, and even set dimmers and time clocks to work together. Everything works over standard wiring, so you gain extra features, while maintaining installation simplicity. Clipsal Iconic also offers a PIR motion sensor module, providing true hands free control to simplify life.

For the connected home

Clipsal Iconic offers a wide range of home connectivity options allowing you to easily connect your home computers, smart devices, TVs and audio equipment. As well as the latest design of data, phone, HDMI, AV, and TV sockets to connect your cabling, you have the flexibility to mix up to six different sockets within the one Clipsal Iconic wall plate for the ideal combination to suit your needs.

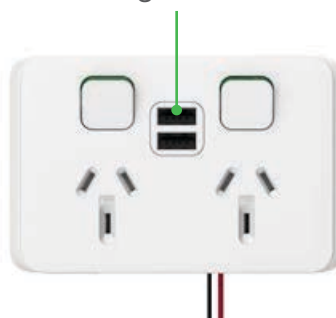

As standard in Vivid White, and optionally in Warm Grey, Cool Grey and Anthracite skin colours

Night Walk skin fits a standard Clipsal Iconic double power outlet grid

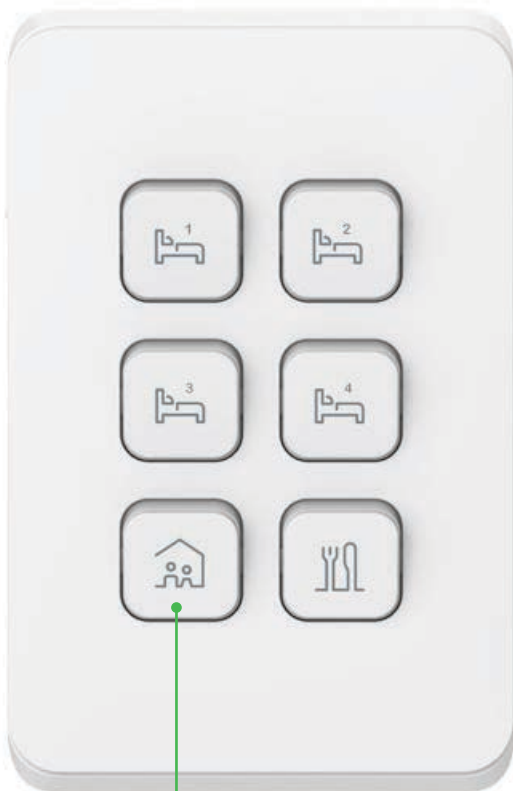

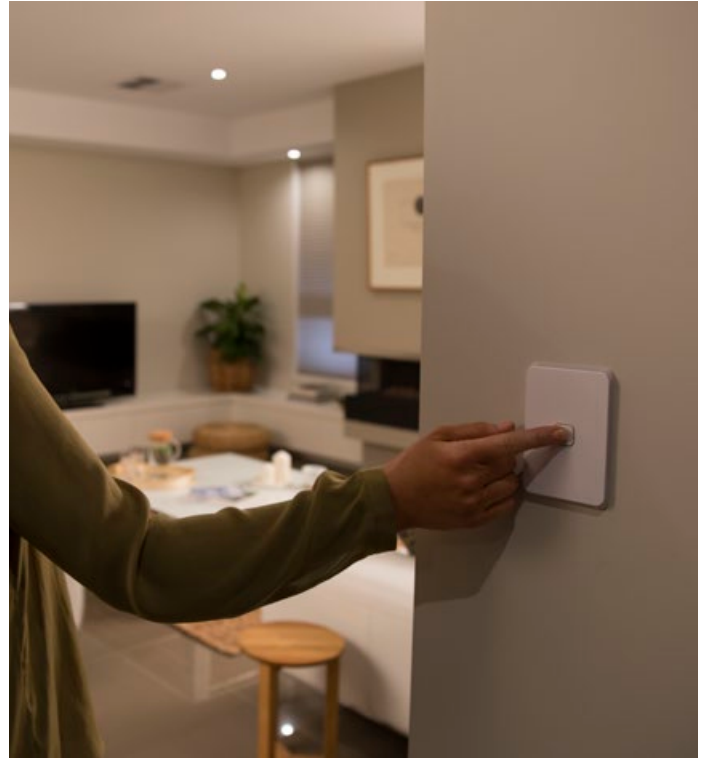

Power outlets are available with USB chargers

The 3-gang USB charger has an integrated shelf for tablets and mobile phones

Clipsal Iconic™ switches are quick and easy to personalise with icon dollies that anyone can change

Translucent edges allow the skins to pick-up background colours for a design that blends in with most wall colours
